

Environment

Environment

The concern for the environment must be borne in the heart and mind. In line with Pulchra services, we worked together to prevent any harmful effects caused by human activities.

Working together with our partners, employees, and suppliers help creates a more sustainable approach on high-quality service to our guests.

We ensure that all our activities and services demonstrate an environmental care that will inspire the lives of each individual.

Global Environment

The implication of climate change to our planet is profound and wide-ranging. Across Pulchra, the effort to uplift environmental consciousness and our commitment to being a deeply responsible company contributing positively to our community and environment.

We harmonized all efforts to protect the people and the environment with the commitment to help build stronger local communities, minimize environmental footprints, create a great workplace, promote diversity and be responsive to our guests health and wellness needs.

Our Commitment...

- A. Reduced chemical usage. Promoted biological control to eliminate non-beneficial insects.
- B. Implement water purification system utilizing the natural energy source. Waste water purified into non-potable water utilized in garden activities.
- C. Adopted the natural source of energy to run the heater without using commercial energy.
- D. Proper garbage segregation and disposal. Committed to make use of biodegradable products. Disposable amenities will be subject to change daily upon guest request.
- E. Mutual care from customer's cooperation in minimizing chemical substance caused by daily washing activities.
- F. Reproduction of compost pit. Made from raw garbage of dried leaves, composted into a profitable fertilizer.
- G. Charcoal Making. Trimmed wood processed into charcoal. Used in cooking grilled specialties. Helps in purifying air and eliminates unwanted smells.

Pulchra takes a step to protect life on earth and demonstrates that human societies will thrive when in balance with nature.
